

Instructions for Room 125H

AFTER USE

* **TURN OFF** the Projector

* **TURN OFF** the Amplifier

* **LOCK** the cabinet, **WITH THE REMOTES BACK INSIDE**, when done

* If you are having any problems, call the Help Desk at x 4429

Projector Instructions:

To turn on the projector, point the remote at the projector (may need to adjust your position), press and hold the **ON** button for about 3 seconds, and in 30 seconds or so you should have a picture.

If you wish to change the source (i.e. the computer is showing and you would like to watch a video) press the **VIDEO** button for the VCR or press the **RGB** button to get back to the computer.

To turn off the projector, point the remote at the projector, press the **OFF** button. A message will appear on the screen saying "Power Off. Are you sure?" Hit the **OFF** button again to select "YES" and the projector will shut itself down.

Video (VHS) Instructions:

To start, make sure the VCR is turned on. The VCR is sitting on top of the computer itself behind the left doors of the cabinet.

Next you will need to change the projector source to Video by hitting the **VIDEO** button on the projector remote.

Audio Instructions:

The amplifier for both the computer and VCR sound is located in the cabinet.

Press the power button to turn it on. The two inputs are labelled for computer and VCR and may be adjusted according to your needs. The master volume knob adjusts the overall volume of the two inputs.

Please ensure the amplifier is turned off when not in use.

Presentation Remote:

This remote is very simple to use. Once you open up Power Point file and start your presentation, you can grab this remote, walk around, and still be in control of your presentation (making sure you are pointing the remote to the projector). There are four buttons to be aware of (as they are labelled in the above picture). The top one is a laser pointer, the two arrows move your presentation forwards or backwards, and the bottom button will “hide” your presentation by putting up a black screen.
